

FELIPE NOVAIS

Senior Software Engineer | Full-Stack, Cloud & Data Platforms

Brasília, Brazil (Remote) | fellipesn17@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software engineer who builds production systems end to end, from cloud infrastructure and data pipelines to APIs and full-stack web applications. Works remotely with US clients, designing solutions on AWS, Snowflake, and dbt, integrating enterprise systems such as Oracle Fusion HCM, CMiC, and Salesforce, and shipping through code review, automated tests, and CI/CD. Builds and maintains personal products in TypeScript, Next.js, and React. Uses AI coding tools such as Claude Code daily and verifies every change with tests before it ships. Works with high autonomy, sets technical standards for the team, and explains trade-offs clearly to business and product stakeholders in fluent English.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, SOQL

Web & Back-End: Next.js, React, Node.js, Astro, REST and GraphQL APIs, Supabase, Progressive Web Apps, Cloudflare Workers

Cloud & Infrastructure: AWS (Lambda, S3, Glue, IAM, CloudFormation), Google Cloud Platform, infrastructure as code, event-driven architecture

Data: Snowflake, dbt, BigQuery, Fivetran, relational data modeling, dimensional (Kimball) modeling, ETL/ELT pipelines, data quality validation

Quality & Delivery: Git, GitHub Actions, Azure DevOps, Jenkins, CI/CD, code review, unit and regression testing (Vitest, dbt tests), debugging, technical documentation, Scrum

AI-Assisted Development: Claude Code, agentic coding workflows, local LLM setups

EXPERIENCE

BRF Consulting

Aug 2021 – Present

Remote from Brasília. Consultancy placing engineers with US technology partners. Also conducts technical interviews for new engineers.

Data Engineer, AICG (US consulting partner)

Dec 2025 – Present

US construction company, Oracle Fusion HCM and CMiC on Snowflake

- Own the warehouse codebase end to end, from source ingestion to the reporting layer, for HR, payroll, and finance.
- Unified two enterprise source systems into a single conformed data model with a clear source-of-truth rule, designing schemas and making grain decisions.
- Replaced legacy reporting logic with tested dbt models and ran parity checks against the old outputs before cutover.
- Defined layering and modeling conventions adopted by the team, including rules that keep PII and unused fields out of reporting.
- Ship models, macros, and custom tests through peer-reviewed pull requests and CI in Azure DevOps, and review teammates' code.
- Wrote field-mapping and data governance documentation, and co-designed the intake process for new requests with business and product stakeholders.

Data Engineer, Red Pill Analytics (US)

Mar 2022 – Mar 2026

- Built ingestion and orchestration services in Python on AWS Lambda, Glue, and S3, including event-driven jobs triggered by S3 object events.
- Automated infrastructure provisioning and deployments with AWS CloudFormation across development, staging, and production, including IAM roles for each service.
- Designed and integrated GraphQL APIs, and set up CI/CD with GitHub Actions to keep broken changes out of production.
- Delivered Snowflake and dbt models across several client engagements, onboarding quickly to each client's stack and conventions.
- On a BCG engagement, reworked existing model logic and introduced incremental models to improve pipeline performance.
- Wrote technical documentation and reviewed pull requests for the team.

Salesforce Developer

Aug 2021 – Mar 2022

- Customized and extended the Salesforce platform for client business processes, owning design, configuration, testing, and deployment.
- Designed platform data models and ran data loads in and out with SOQL and SOSL, owning data quality for business users.

Internship Trainee, BRB (Banco de Brasília)

Apr 2021 – Jun 2022

- Supported development and maintenance of internal banking systems, SQL performance tuning, and monitoring of production logs and transactional systems.

Earlier Experience

2017 – 2020

- Ad Ops Analyst, Metrôpoles: campaign delivery and performance reporting for commercial teams.
- IT Intern, CEASA-DF: development and maintenance of web systems, plus network and server support.

PROJECTS

Fluxo, Personal Finance App

Next.js, React, TypeScript, Supabase

- Designed and built a personal finance app end to end: cash flow, monthly projections, credit purchases, and bank statement import, with authentication and a Postgres backend on Supabase.
- Delivered as an offline-capable Progressive Web App, with a CI gate of linting, type checking, and unit tests (Vitest) before every merge. Taken to early users.

Felipe.log, Personal Site (fsnovais.github.io)

Astro, Cloudflare Workers, GitHub Actions

- Bilingual site and blog migrated from Create React App to Astro, deployed through GitHub Actions, with a Cloudflare Worker isolating the newsletter provider and privacy-compliant forms.

EDUCATION

B.Sc. in Computer Science, UNICEUB

2018 – 2023

Postgraduate Degree in Financial Management

CERTIFICATIONS

- dbt Developer (2024)
- DevOps Essentials Professional Certificate, DEPC (2019)
- Scrum Foundation Professional Certificate, SFPC (2019)
- Anthropic Academy coursework toward Claude certification (in progress)
